

Prof. Dr. Alfred Toth

Distribution semiotischer Objektrealitäten

1. Nach Bense (1992, S. 44) gibt es drei semiotische Realitäten: Objekt-, Eigen- und Kategorienrealität (vgl. Toth 2025a, b). Wir zeigen nun die Distribution der Dyadenpaare und ihrer Trajekte (vgl. Toth 2025c) für alle drei Realitäten.

2. Objektrealität
